

# FRACTIONAL IT LEADERSHIP. FULL-TIME IMPACT.

## About Fractional IT Services

Not every nonprofit needs - or has the budget for - a full-time tech director. But every nonprofit deserves smart, strategic technology leadership.

Fractional IT assistance means you get an experienced partner who can help you plan, prioritize, and manage technology projects - without the cost or commitment of hiring in-house.

Whether you're overwhelmed by software decisions, struggling with vendor coordination, or ready to implement a tech roadmap, we'll help you make confident, informed moves.

**Ready to get your tech house in order?  
Let's talk about how fractional IT  
leadership can support your team.**

## How We Can Help

- Provide strategic advising for tech decisions and investments
- Assist with creating, implementing, or updating your technology plan
- Guide and manage tech-related projects (like CRM or website overhauls)
- Act as a liaison between your team and managed IT providers or tech vendors
- Research tech solutions and explain options in plain language
- Design or review internal policies and IT documentation
- Offer change management support
- Deliver tech trainings your staff will actually understand

Smart Strategy.  
Creative Insight.  
Compassionate Consulting.
